What Medical Grade Actually Means

The term "medical grade" gets used loosely in the beauty industry, but here is exactly what it means at realdrseattle®

- **Clinically Backed Ingredients:** Every ingredient earned its place through clinical evidence, not hype. We prioritize actives with real research behind them—like Retinol, Hyaluronic acid, Ferulic acid, and Aloe—chosen purely for what they do.
- **Developed by a Surgeon:** Every product is formulated and approved by Dr. Javad Sajan, a world-renowned plastic surgeon who works intimately with skin every day.
- **Built for Procedure-Level Skin:** Our formulas are gentle enough for skin preparing for or recovering from a clinic treatment, yet effective enough for anyone who simply wants a healthier complexion.
- **Honest Pricing:** Enjoy the same quality that clinics typically charge \$100 for, offered here for a fraction of the cost. Medical-grade skincare should not require a payment plan.

Real Medical Science. Everyday Usability.

Dr. Javad Sajan, MD

Triple Board Certified Plastic Surgeon

The Man Behind the Science

As a plastic surgeon based in Seattle, Washington, Dr. Javad Sajan constantly fielded the same questions from his patients: what skincare should they use, and how much will it cost? The medical-grade products often recommended were simply too expensive. He believed that true medical-grade skincare should not require spending hundreds of dollars just to see a difference.

This inspired him to create *realdrseattle®*. It is a medical-grade alternative designed to be pocket-friendly and accessible to everyone, with products priced at just \$9.99. Formulated with the exact same care and precision Dr. Sajan uses in his practice, this high-quality collection combines real medical science with everyday usability. It delivers results you can trust, without the huge price tag.
